WS-TPOS/50
IP65 rated temperature transmitter

4-20mA output

Features

- Temperature range -10°C to +50°C
- Output 4-20mA

Description

The WS-TPOS/50 is a IP65 rated temperature sensor. It has a range of -10°C to +50°C and gives a 4-20mA output. This makes it ideal for monitoring and control.

The WS-TPOS/50 is also well suited for use with the range of instrumentation with analog input from AIC.

Order Code	WS-TPOS/50

This transducer is ideal for direct connection to a PLC or can be used with AIC's extensive range of DC analog input instrumentation.
Visit AIC's website (http://www.aicpl.com.au) for information about Amalgamated Instrument Co (AIC) instrumentation products.

Specifications

Enclosure	Polycarbonate
Supply	2-wire loop powered - 24VDC
Output	4-20mA
Width	60mm
Height	65mm plus 10mm for cable gland
Depth	40mm

Connection Details

24VDC
